

## uvex x-trend · 9177

### Stylish yet protective – the latest trend in safety eyewear

With an anatomically shaped wrap-around lens, the uvex x-trend is an expression of fashion today – after all, eyewear with large lenses conquered the world long ago. In addition to its stylish design, the uvex x-trend offers a high degree of safety with its large lens.

It offers a clear view in all directions, 20 % more cover than normal temple glasses, UV protection up to 400 nm and if desired, the comfortable uvex side arms with x-stream-technology (XST).

The uvex x-trend – stylish yet protective. Now there's no longer any need to hide behind your spectacles at work.

Optional:

uvex XST for extreme comfort that you can feel! Thanks to a smooth transition from hard to soft plastic.

- Smooth transition between materials
- High flexibility
- Non-slip surface
- Patent pending
